

COTEMAR

We are a Mexican company specialized in services for the oil industry since 1979. The core services we provide are concentrated on modernization, construction and maintenance, support to maritime operations, as well as food and accommodation for offshore oilfield development.

Mission

We are an offshore oil services company which contributes to the oil and gas industry production, based on our efficient processes, implemented with industry-leading technology and success driven people.

Vision

To be a sustainable company with greater participation in new business segments within the oil market on a global scale, increasing our involvement in the production processes, supported by a fleet of latest generation vessels, as well as new and innovative work methods.

Our core services are divided into:

- Modernization, Construction, Maintenance and Engineering: From the outset of prefabrication and assemble, up to the start of operations, we actively participate in the construction and maintenance of platforms and processing centers.
- Specialized Vessel and Maritime Support: We offer transportation and logistics services, as well as fluid processing with the use of specialized vessels equipped with the latest technology in the Campeche Sound (Sonda de Campeche).
- Food and accommodation services: With more than 37 years of service in the oil industry, we have the required capabilities to provide offshore food and accommodation services throughout the platforms and vessels that we operate.

CONSTRUCTION, MODERNIZATION, MAINTENANCE AND ENGINEERING

Our more than 37 years of experience are reflected in the exceptional service quality and the use of leading and cutting edge technology in the development of our operations.

OUR ONSHORE OPERATIONS

From 2016, Servicios a la Industria Petrolera Lifting de Mexico, a subsidiary of Cotemar, was awarded the Cuichapa Poniente area contract, located in the municipality of Moloacan, state of Veracruz, Mexico. The contract was awarded as a result of our participation in the third stage of Round 1 tender led by the Comision Nacional de Hidrocarburos.

We have semi-submersible platforms equipped with dynamic positioning that allows them to nimbly and efficiently move from one complex to another, providing the best quality service.

These vessels have large loading capacity maneuvering cranes, working decks for the construction and assemble of prefabricated structures, as well as storage areas. In addition, our platforms have areas for construction, transportation of cargo, as well as material and equipment supplies, bringing superior value and service to our clients.

The operations control is performed with equipment enabled with mobile technology, allowing capturing field information. Operational planning is supported by advanced information systems facilitating on time completion of tasks and projects.

Our platforms operate with top of the line technology. For example, the Neptune and Atlantis have:

- Dynamic Positioning System DP-III.
- Main Crane: 300 Ton @ 18m and supporting hook 25 Ton @ 71m.
- Capacity to hold up to 750 people.

SPECIALIZED AND MARITIME SUPPORT VESSELS

These vessels allow us to contribute to the value chain and the sector's development in Mexico, in addition to connecting the life in the platforms with Ciudad del Carmen.

Our specialized services include vessels such as:

- Tugboats and barges for the transportation of larger structures required for oil operations. Processing and transportation of oil and liquids extracted from the platforms
- Supply vessels
- Barges
- Speed Boats personnel carriers
- Multi Purpose Ships with high-capacity cranes

ACCOMMODATION AND FOOD SERVICES

The platforms and vessels we operate have an installed capacity to provide offshore food and accommodation services to more than 4,000 personnel simultaneously.

These services comprise:

- Food preparation.
- Laundry and ironing.
- Cleaning of common areas.
- Bed services in each cabin.

Our platforms hold cabins for 1, 2 or 4 people, as well as recreational areas such as cinemas, gym, basketball courts, ping pong tables, and TV rooms, among others.

OUR PEOPLE

In COTEMAR our strength resides in the experience and commitment of our people. We work every day to maintain leadership in our operations. Our high-quality service, reliability, and operations excellence differentiate us through innovation, ability to respond, and our people's talent.

The professional development of our people is essential. We have trained over 8,000 collaborators through the implementation of development plans and training programs in distinct areas of operation within the company.

Integrity

We act in a congruent, honest, and ethical manner inside and outside of our organization, reflecting our values.

Effectiveness

We are accountable for achieving our business results, our people and our communities, with solid focus and commitment to satisfy our customer needs.

Humility

We have the ability to learn and improve each day with a positive attitude based on respect, fair treatment, and teamwork.

Innovation

We continuously challenge our way of being and thinking, generating more and better alternatives to create greater value for customers and the organization.

OUR COMMITMENT

We are a socially responsible organization committed with our environment. For three consecutive years, we have received the distinction as a Socially Responsible Company due to our dedication and commitment to the wellbeing of our people, care and protection of the environment, and ties with our communities.

Among other certifications and distinctions we have received are:

- International Air Pollution Prevention, Lloyd's Register Central and South America LTD.
- Safety Management Certificate, Dirección General de Marina Mercante de la SCT.
- International Certificate for the Protection of Vessels and Harbor Installations, Trust of the National Merchant Marine for the Formation and Training of Personnel (FIDENA)
- Certificate ISO 9001:2008
