

Lifting de México reaffirms its leadership with the ESR® certification for the sixth consecutive year

October 29, 2025.

Mexico City, Mexico.- Servicios de Extracción Petrolera Lifting de México has been recognized for the sixth consecutive year with the ESR® (Socially Responsible Company) certification, an award granted by Centro Mexicano para la Filantropía (Cemefi). This distinction certifies compliance with the highest standards of the accreditation model under Environmental, Social, and Governance (ESG) criteria, consolidating the company's position as a leader in sustainability within the national energy sector.

Obtaining the ESR® certification involves a rigorous evaluation process that encompasses ethical practices, quality of work life, community engagement, and environmental management. This process is independently verified by Cemefi and reaffirmed annually, which allows Lifting de México to maintain a corporate culture oriented towards continuous improvement and responsible development. It also accredits Lifting de México before its employees, clients, investors, authorities, and society as a company that assumes social responsibility as an essential part of its business strategy.

By receiving this distinction for the sixth consecutive year, Lifting de México reaffirms its commitment to transparency, industrial safety, environmental protection, and the well-being of the communities where it operates. This achievement reflects the company's commitment to generating shared value through responsible, safe, and sustainable practices, which strengthen its position as a leader in the national energy sector.

“The ESR certification encourages us to continue strengthening a corporate culture based on sustainability, safety, and commitment to our people and the communities where we operate. At Lifting de México, we understand that social responsibility is not an add-on, but a strategic pillar for the country's development. Therefore, we align our performance with the Sustainable Development Goals of the 2030 Agenda, contributing to the future of a more ethical, safe, and sustainable energy industry,” highlighted an institutional source.

About Servicios de Extracción Petrolera Lifting de México, S.A. de C.V.

Lifting, a company within the Cotemar Group, is a 100% Mexican company dedicated to onshore hydrocarbon exploration and production, with extensive experience and efficient and safe operating processes. Lifting was created to drive the development of the energy sector in Mexico; through bidding processes organized by the National Hydrocarbons Commission (CNH), it was awarded two license contracts for the extraction of hydrocarbons in the Cuichapa Poniente and Paso de Oro fields, located in the state of Veracruz. Lifting makes a significant contribution to the recovery of Mexico's oil sovereignty.
